WORK EXPERIENCE

People's Television Network Inc. (PTV-4) Visayas Avenue, Diliman, Quezon City
IT Intern Feb 2026 – Apr 2026

- Configured Cisco network hardware and performed infrastructure cable management.
- Managed signal/video routing, external video feeds, and source configurations.
- Executed master control system commands and synchronized live broadcast transitions.
- Monitored digital transmitter performance metrics and maintained technical logs for systems stability.
- Administered broadcast traffic logs and optimized commercial program scheduling.
- Digitized, organized, and archived critical technical project documentation for the PMO.

PROJECTS

Kaizen (Web-Based Progressive Overload Analytics App) June 2026

- Developed a full-stack tracking application using Next.js, TypeScript, and Supabase, achieving 100% type-safety across all server-to-client data pipelines.
- Integrated an automated DOTS coefficient calculator that instantly evaluates relative strength using multi-variable bodyweight formulas, reducing calculation latency to under 50ms.
- Constructed a custom time-series grouping engine using Recharts to plot 3 independent progression lines simultaneously while handling missing data points cleanly.
- Created a hybrid inline-CRUD spreadsheet ledger utilizing context-menus, which slashed historical log entry and modification times by over 50%.

TreaSureTrack (Web-Based Inventory & Maintenance System) April 2025 – November 2025

- Streamlined regional maintenance operations by engineering a full-stack system using ReactJS and Laravel, reducing manual processing time by 40%.
- Conducted user testing and presented comprehensive technical documentation to faculty, ensuring high-quality software delivery and a successful system defense.
- Implemented a MongoDB database for real-time logging and asset tracking, improving data retrieval speed by 30% for Bureau of the Treasury (BTr) employees.
- Developed Python automation scripts to parse PDF reports, which cut data entry errors by 95% and significantly accelerated reporting workflows.

SKILLS

- **Programming**: C#, Python, MongoDB, MySQL, HTML5, CSS3, JavaScript, PHP.
- **Frameworks & Libraries**: NextJS, ReactJS, TailwindCSS, Laravel, Git, Visual Studio, SAP S/4HANA (Fiori)
- **Database & Tools**: MongoDB, MySQL (XAMPP), Postgres (Supabase)
- **Design & Multimedia**: Adobe After Effects, Adobe Photoshop, Figma
- **Infrastructure & Networking**: Cisco IOS, PuTTY, IPv4 Subnetting, Linux SysAdmin

EDUCATION

STI College Legazpi Legazpi City, Albay
Bachelor of Science in Information Technology August 2022 - June 2026

CERTIFICATIONS & TRAININGS

Python Essentials 1	Cisco Networking Academy
Modules of S/4HANA using Global Bike	Global Bike
Systems Administration	Linux Professional Institute
JavaScript Fundamentals and Projects	Udemy
Programming Foundations: Software Testing/QA	LinkedIn Learning
API Testing Foundations	LinkedIn Learning
